

Get Headlines

The screenshot displays the PixieBrix web browser interface. The top navigation bar includes tabs for Elements, Console, Sources, Network, Performance, Memory, Application, Security, Lighthouse, Adblock, Redux, and PixieBrix. The PixieBrix tab is active, showing a workflow editor with a sidebar on the left and a main workspace on the right.

Left Sidebar:

- Quick filter:** A search bar for filtering actions.
- Single-Page Annalisa @ Quizzzy.News: Generate Content with ChatGPT:** A blue action card with a magnifying glass icon and a plus sign.
- Testing ChatGPT section:** A blue action card with a magnifying glass icon and a plus sign.

Brick Actions Panel:

- Context Menu @input:** The first action in the sequence.
- Go get top headlines from Newsweek @NewsAPIresponse:** The second action, highlighted in blue. It includes a plus sign and up/down arrows.
- Create Chat Response with ChatGPT @chatGPTquestions:** The third action, featuring the ChatGPT logo and up/down arrows.
- Parse JSON:** The final action in the sequence.

HTTP Request Panel:

- Step Name:** Go get top headlines from Newsweek
- Output:** @ NewsAPIresponse
- URL:** `https://newsapi.org/v2/top-headlines?apiKey=378791e8806d4dfca88d1bbe51d1adb3&sources=Newsweek`
- View Documentation:** A link to the API documentation.
- The API endpoint URL:** A label for the URL field.
